

We are Australia's leading provider of Aged Care technology solutions. Our purpose is to improve quality of life, later in life.

We Believe...

Meaningful revolutions start with safe evolutions

Data should be used to ensure dignity

Technology is best when combined with human intelligence and the human touch

The best care is informed care

We Are...

ASX listed

Supported by Australia-wide distribution channels

B2B2C, fulfilling all hardware and software requirements

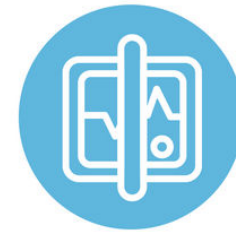

The possibilities for care at home have changed.

Which of the **Big 5 Challenges** are your strategic and focus areas?

Better Compliance

- Staying ahead of State Legislative requirements
- Protection against unnecessary tribunal action
- Capturing and recording resident data

Commercial Viability

- Retaining clients and improving re-sale value
- Maintaining a competitive advantage
- Developing recurring revenue streams

Operational Efficiencies

- Maximising staff utilisation
- Enhanced automated reporting
- Reducing churn

Enhanced Communication

- Providing the right info to staff and families
- Identifying promoters
- Alleviating stress for staff and families

Client Autonomy

- Improving safety
- Data informed management
- Preserving independence

The HSC range of sensors will help you address them all.

The range can be used individually or be implemented together as a whole solution.

Sleep Sense. Discreet under-leg sensor monitors movement and vital signs.

Emergency buttons. Easy access and unobtrusive design.

Jewellery Emergency pendant. With Fall Sensor and lovely design to aid wearing.

LifeWatch. Lightweight, with GPS tracking and emergency alerts

Door sense. Monitors doors and drawers to alert for anomalies.

Care@home Hub. 2-way voice activated emergency system. Mobile and with wall mount.

MD Sense Falls Radar. Detects movement and automatically escalates when required.

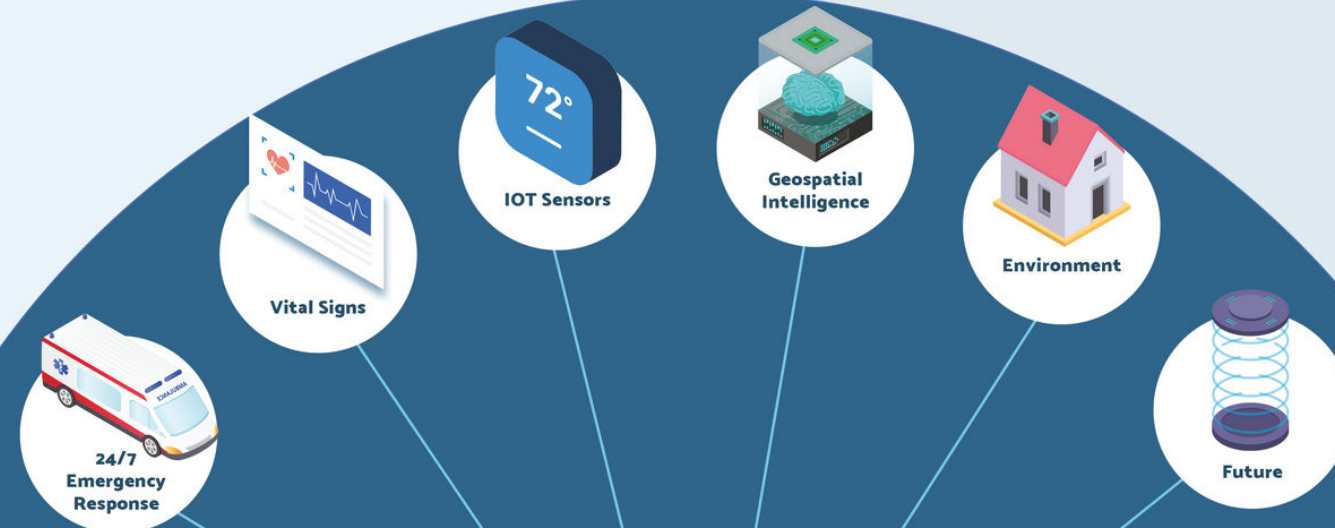

Button and Pull Cord. Voice activated and waterproof alert system.

Our sensors are all powered by the Talius Smart Care platform.

Talius is the technological heart and hub of HSC sensors, gathering and analysing data from all sensors to help you make more informed business and care decisions, while providing an extra layer of security for your clients.

Awareness

It starts by providing proactive sensors that enhance safety from multiple angles.

Analysis

The data is captured within Talius – an agnostic AI engine that links in with existing systems and technology. Talius provides oversight in simple dashboards to improve outcomes.

Improved Business Outcomes

- Reporting
- Compliance
- Data informed decision making
- Benchmarking

Improved Resident Outcomes

- Data informed care plans
- Daily living dashboard
- Personalised care schedules

Action

Talius uses advanced predictive interpretation to automatically detect anomalies and complete proportional actions.

Talius will give you a competitive advantage.

You get a platform for the future - helping you make care, staffing and business decisions in a way that's scalable

You go beyond simple alerts - processing real-time data, immediately triaging and connecting with the most appropriate action

You get a competitive technology advantage - our solution includes imported HSC components you can't get anywhere else

You get care that's commercial - Talius can become a recurring revenue generator without requiring any capital expenditure

You go beyond delivering services - providing your clients with options for improving their safety in all aspects of their life

Talius powers Australia's most innovative providers
