

Talius Extends Hato Hone St John Partnership into Metlifecare Villages

28 May 2026

HIGHLIGHTS

- Hato Hone St John has engaged Talius to extend the partnership into Metlifecare's retirement village portfolio, one of New Zealand's largest operators, with 37 villages nationally and an EQT Infrastructure-backed ownership structure.
- Initial deployment covers three newly constructed villages (Rototuna, Mangawhai, Wānaka) with St John providing 24/7 remote emergency response.
- Integration delivered via the Talius Stratix Integration Module, connecting Miracle and Austco nurse call systems to enable centralised monitoring without infrastructure replacement.
- Demonstrates the depth of Talius' partnership with Hato Hone St John following recent 3G transition deployments and validates demand for enterprise-grade integration capability across the aged care continuum.
- Establishes the foundation for potential progressive rollout across Metlifecare's broader NZ portfolio over time.

Talius Group Limited (Talius or the Company) (ASX: TAL), Australia's leading aged care data platform delivering real-time care workflows and automated compliance, is pleased to announce that Hato Hone St John Ambulance (**St John**) in New Zealand has engaged Talius to extend the Talius One Platform to support the integration of existing nurse call systems installed at Metlifecare retirement villages.

Metlifecare is one of New Zealand's largest retirement village and aged care operators, with a significant national footprint comprising 37 villages housing 7,200 residents, with portfolio growth continuing.

The initial deployment will support three newly constructed Metlifecare retirement villages located in Rototuna, Mangawhai and Wānaka.

Under the engagement, Metlifecare has appointed Hato Hone St John to provide 24/7 remote emergency response services across the villages. Talius will deliver the underlying integration through its Stratix Integration Module, which connects existing Miracle and Austco nurse call systems into the Talius One Platform, converting legacy signals into digital events that enable St John to centrally manage emergency response and operational oversight across the portfolio.

Importantly, the Company has been advised that, following the initial deployment phase, Metlifecare intends to progressively extend the service across its broader portfolio of 37 villages throughout New Zealand.

The project further strengthens the Company's strategic relationship with St John, following recent deployments associated with New Zealand's transition away from 3G-based emergency systems.

Commenting on the engagement, Pat Howard, Managing Director and CEO of Talius said:

"Extending our work with Hato Hone St John into Metlifecare's villages is a strong validation of the Talius One platform's ability to integrate with the nurse call systems already in market, including Miracle and Austco, rather than requiring operators to replace hardware. That device-agnostic capability is what makes enterprise-scale rollouts commercially viable, and it's why we're seeing momentum across the aged care continuum."

The Company will provide further updates as the deployment progresses.

This announcement has been authorised by the Board of Directors of Talius Group Limited.

About Talius Group Limited (ASX: TAL)

Talius Group Limited (ASX: TAL) is a real-time healthcare data platform company delivering integrated care technology across Australia's aged care sector.

The Company's device-agnostic Talius One Platform combines real-time sensor data, CSIRO-validated analytics and automated compliance workflows in a single governed environment, delivering automated alerts, workflow integration and compliance reporting across home care, retirement living, residential aged care and hospital settings. Deployed by major aged care providers including Bolton Clarke, Uniting Care, Keyton and St John, the Platform supports proactive care delivery and operational efficiency across the care continuum.

As of FY25, Talius has 51,150+ active subscriptions and \$3.3M in Annual Recurring Revenue (+12.7% YoY). The Company is executing a disciplined platform scaling strategy under CEO Pat Howard, whose previous leadership at MSL Solutions delivered a growth in market capitalisation from \$16M to \$120M.

FORWARD LOOKING STATEMENTS

Certain statements contained in this ASX release, including information as to the future financial or operating performance of the Company and its projects, are forward looking statements. Such forward looking statements:

- (a) are necessarily based upon several estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant technical, business, economic, competitive, political, and social uncertainties and contingencies;*
- (b) involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward looking statements; and*
- (c) may include, among other things, statements regarding estimates and assumptions in respect of prices, costs, results, and capital expenditure, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social, and other conditions. The Company disclaims any intent or obligation to publicly update any forward-looking statements, whether because of new information, future events, or results or otherwise.*

The words "believe", "expect", "contracted", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule", "planned" and similar expressions identify forward looking statements. All forward looking statements contained in this ASX release are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly recipients are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein.
